THE BRAND

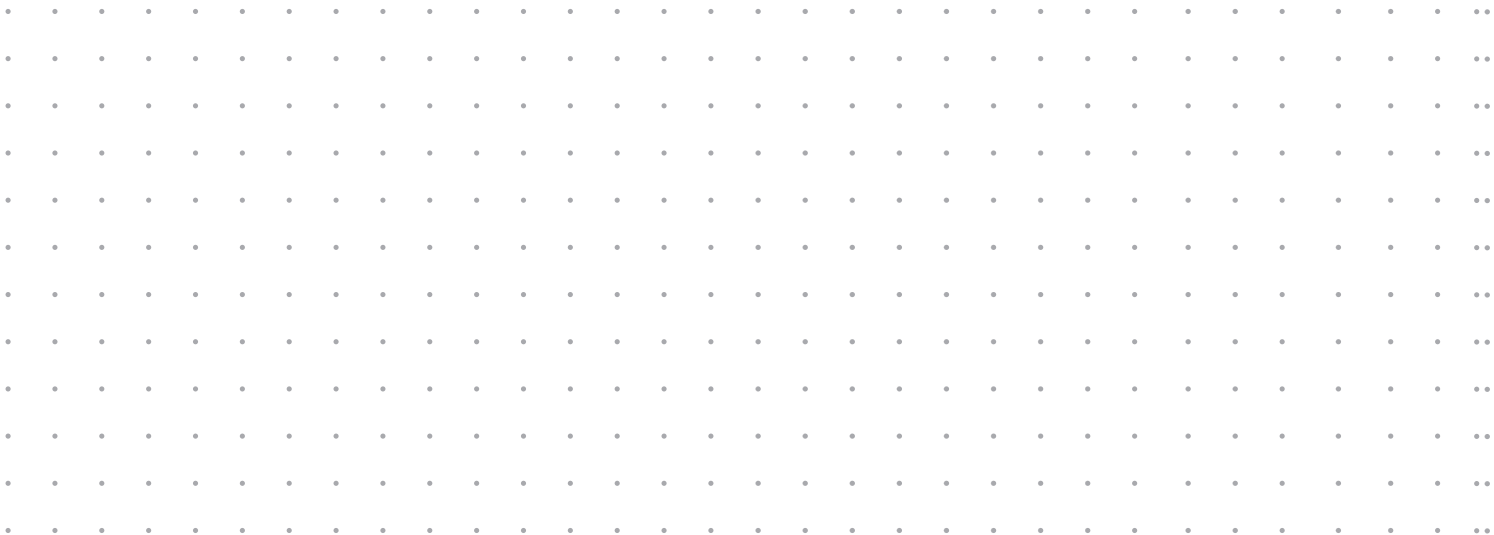

It was in 2014 that Sysmed Exim Pvt was established to take on the mission to make healthcare services more accessible and affordable to all. Since then, the sole purpose of the organisation has been to enable healthcare and empower human care. It is driven with the objective of providing efficacious health-related services to the masses through innovative thinking and providing world-class health services to all. Sysmed has actively contributed towards simplifying the overburdened healthcare infrastructure of the country. In a short span of time, it has emerged as one of the largest aggregators of medical supplies in India and has also been a major exporter of the same to the Middle East, Africa, Latin America and Asia.

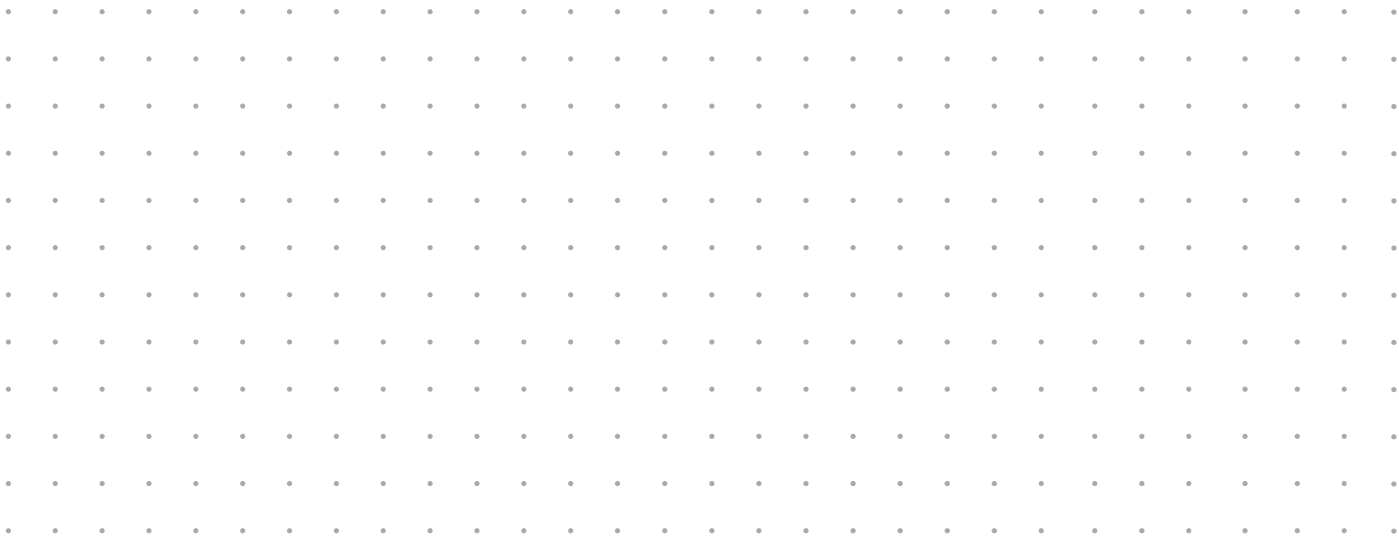

THE VISION AND VALUES

Since the inception of Sysmed, we have adhered to the principle of sustenance-driven development and success. Our daily operations are directed towards delivering the best healthcare solutions through top-notch innovations to suit the need of the hour of the vast demographic across the expanse of our country. Our vision is to effectively deliver quality healthcare equipment and supplies through timely intervention to ensure the paramount health of all patients.

MEDICAL DEVICES AND EQUIPMENT SUPPLY

Our USP lies in our concerted efforts to ensure war-footing delivery mechanisms, especially during exigencies. Our ability to provide curated and personalised solutions according to the needs and budget of the client without compromising on quality and efficiency has enabled us to serve and positively impact a large and dynamic population. Right from evaluation to execution, Sysmed has proven to be a reliable companion. The supplies and equipment that can be arranged include:

Neonatal and paediatric care equipment

Radiology and imaging devices

Diagnostic equipment and supplies

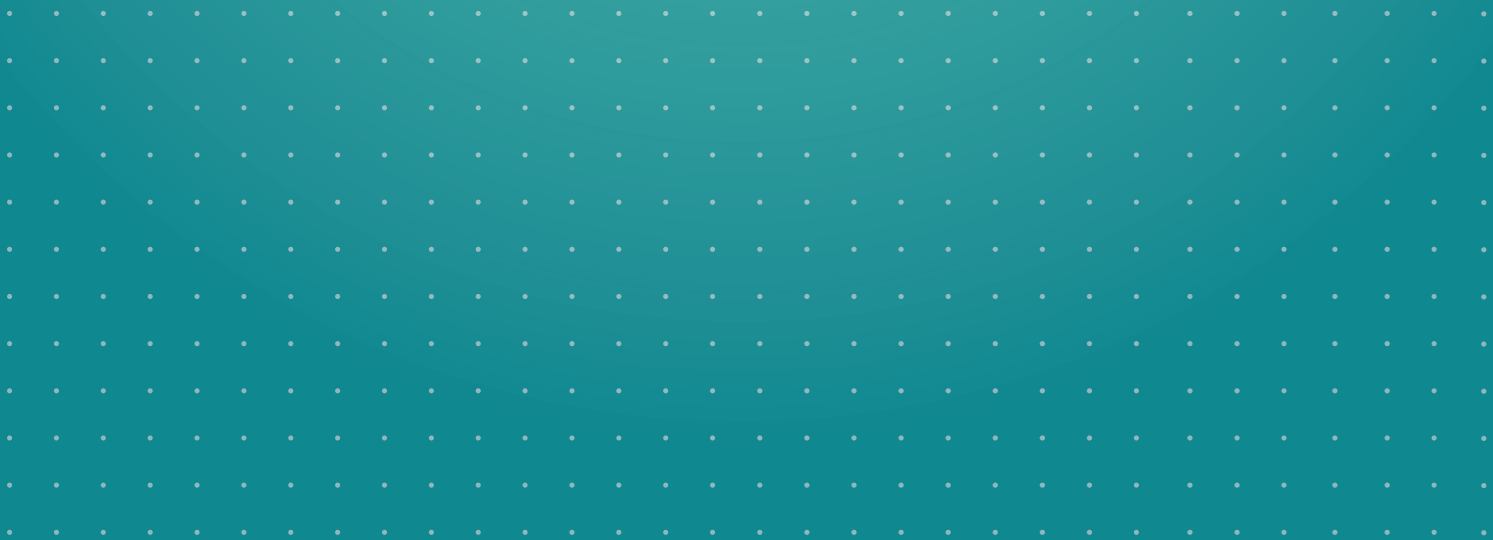

General surgery equipment and supplies

Dental care unit

POCT

Hospital furniture and accessories

AMBULANCES AND MEDICAL MOBILE UNITS

We believe that distance and location should not be an obstacle to accessing quality healthcare. To this effect, Sysmed also specialises in delivering complete customised on-wheel solutions so that timely and quality aid can be provided even to the remotest places. Our mobile units are fitted with world-class care systems and micro-units to ensure all-round monitoring of patients' health. The mobile units can also be customised to suit different purposes. These include:

Radiology and pathology labs on-wheels

ALS and BLS Ambulances

Mobile blood donation units

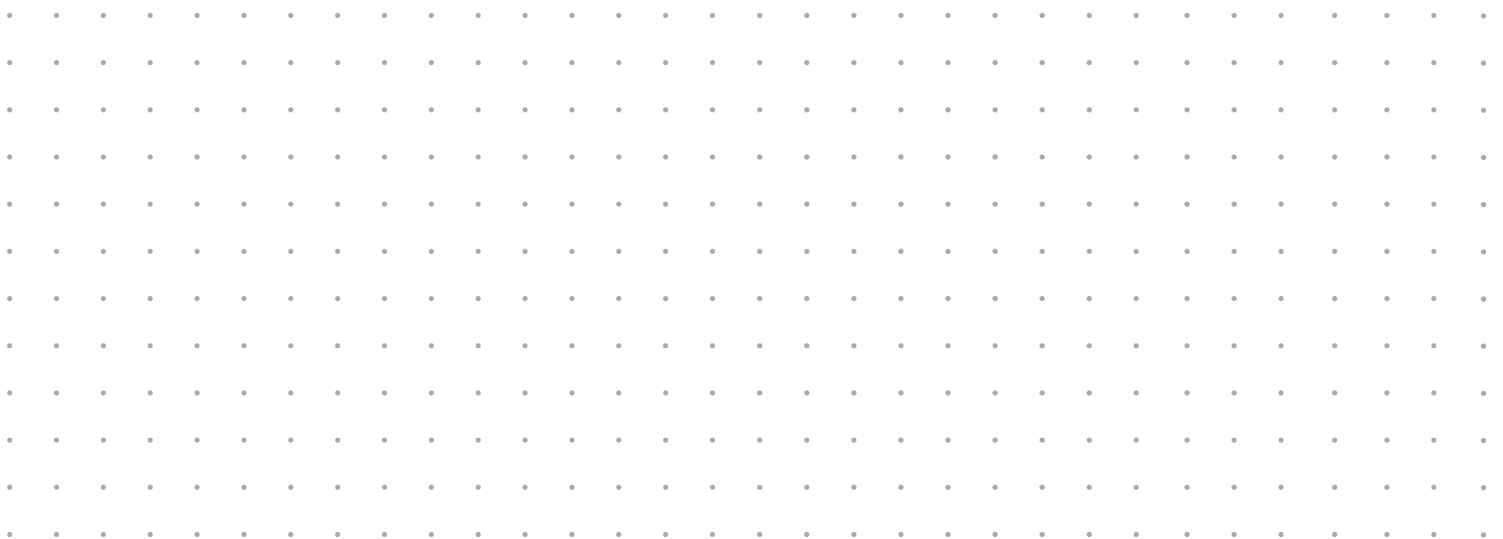

Mobile Dental, Ophthalmic, Dermatology, ENT units

Vaccine carrier units

Mother and child care units

Cancer detection vehicles

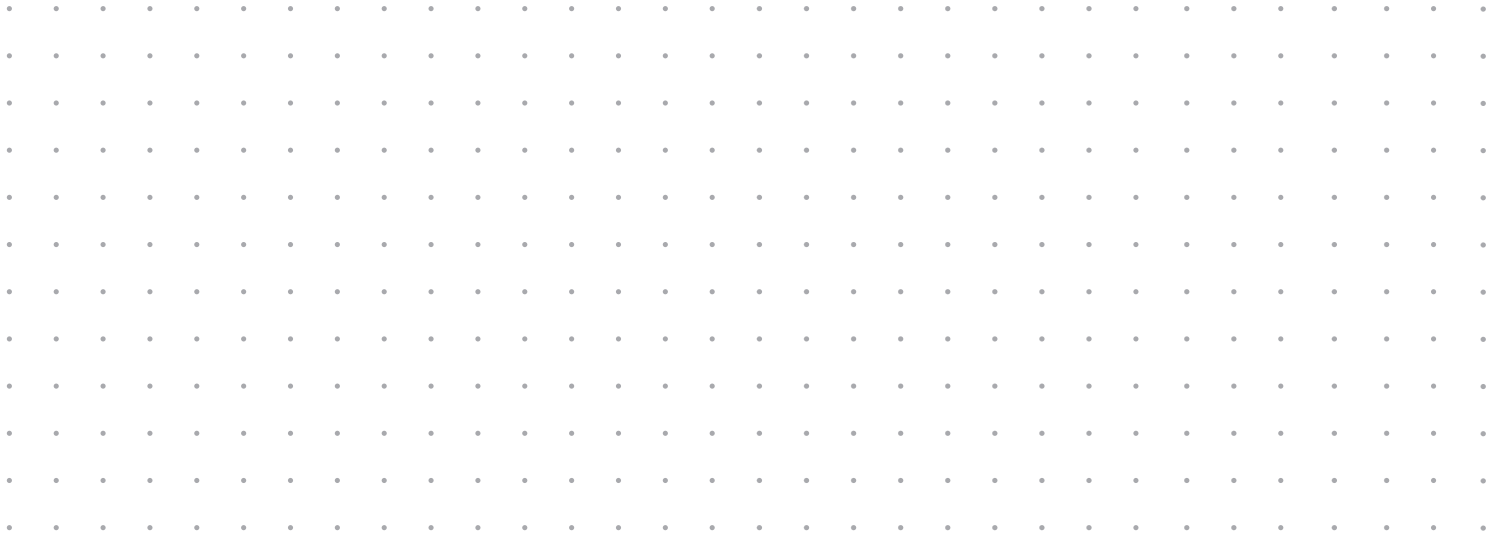

Animal ambulances

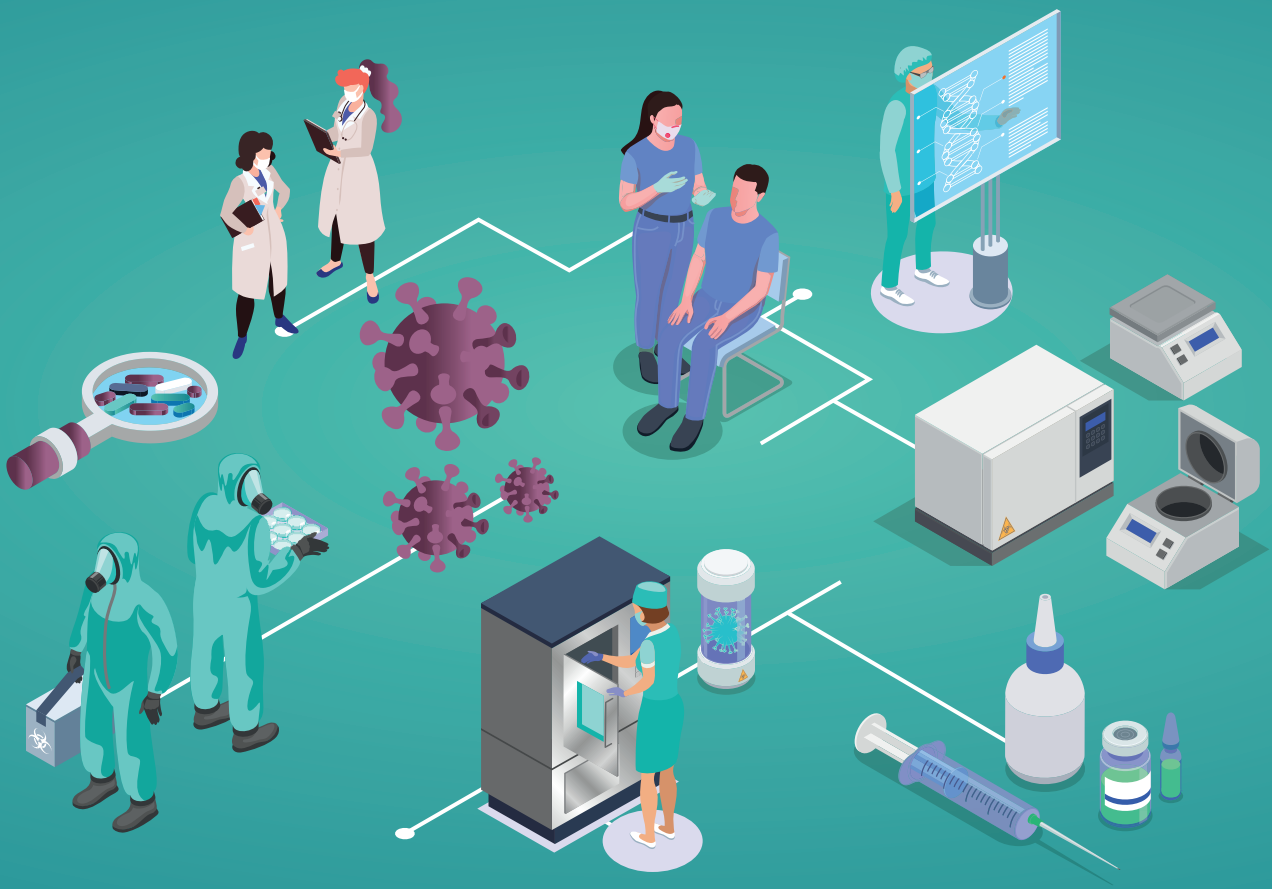

PHARMACEUTICALS AND CONSUMABLES SUPPLIES

We recognise the need for easy availability of medicines, especially during externalities. We strive to ensure that essential, as well as disease-specific drugs, are available in hospitals and healthcare units even in far-flung corners of the country. To ensure timely delivery of the same, we have tied up with a comprehensive network of suppliers of pharmaceuticals and medical consumables. Pharmaceutical and medical consumables offered are:

- Essential drugs**
- HIV drugs**
- Oncology drugs**
- Drugs for health issues related to Urology, Gastro-enterology, Gynaecology and Paediatrics**
- Pathology lab products**
- Anaesthesia and critical care**

EMERGENCY AND PANDEMIC PROTECTIVE SUPPLIES

Our operations are driven with the intent of saving as many lives as possible through timely provisioning of protective gear and medical supplies, especially during emergencies like COVID-19. Additionally, we also provide professional and trained staff that is equipped to deal with any health crisis and bring best possible relief during health emergencies. We also provide:

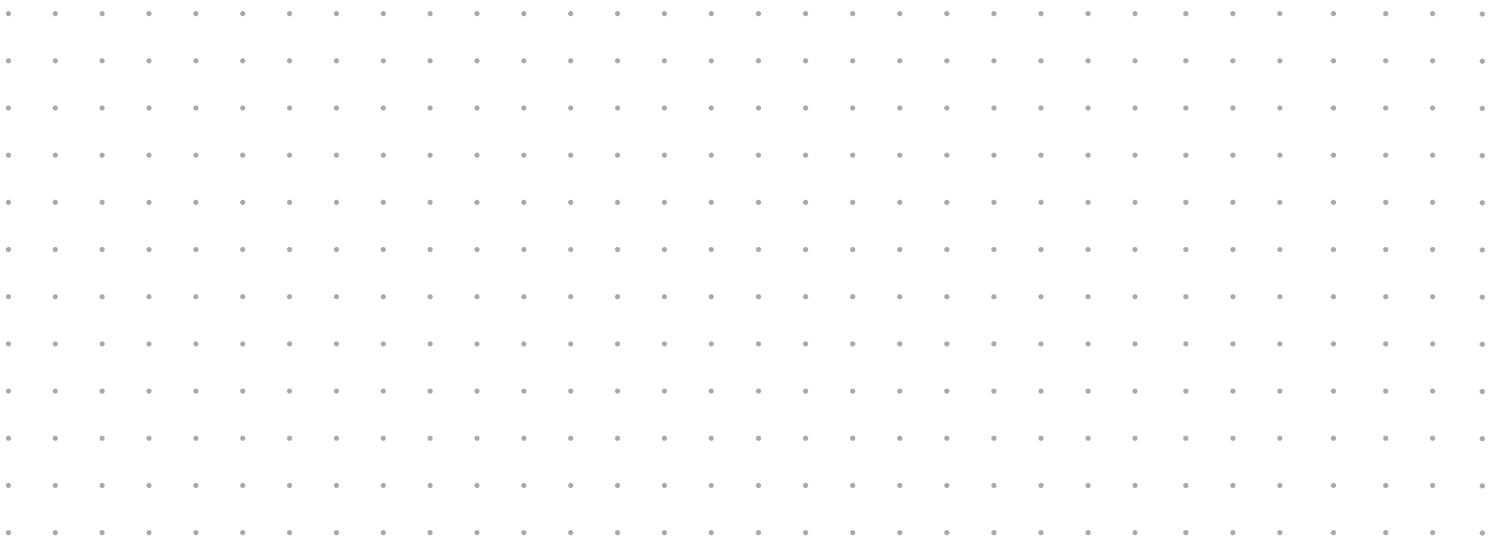

Fully equipped Ambulance Services with mobility ventilators

ICU Upgradation & equipment support

Sub-acute care Ventilators for ICUs

First Aid Kits

Pharmaceutical Support

TURN-KEY DEVELOPMENT OF HEALTHCARE FACILITIES & INFRASTRUCTURE

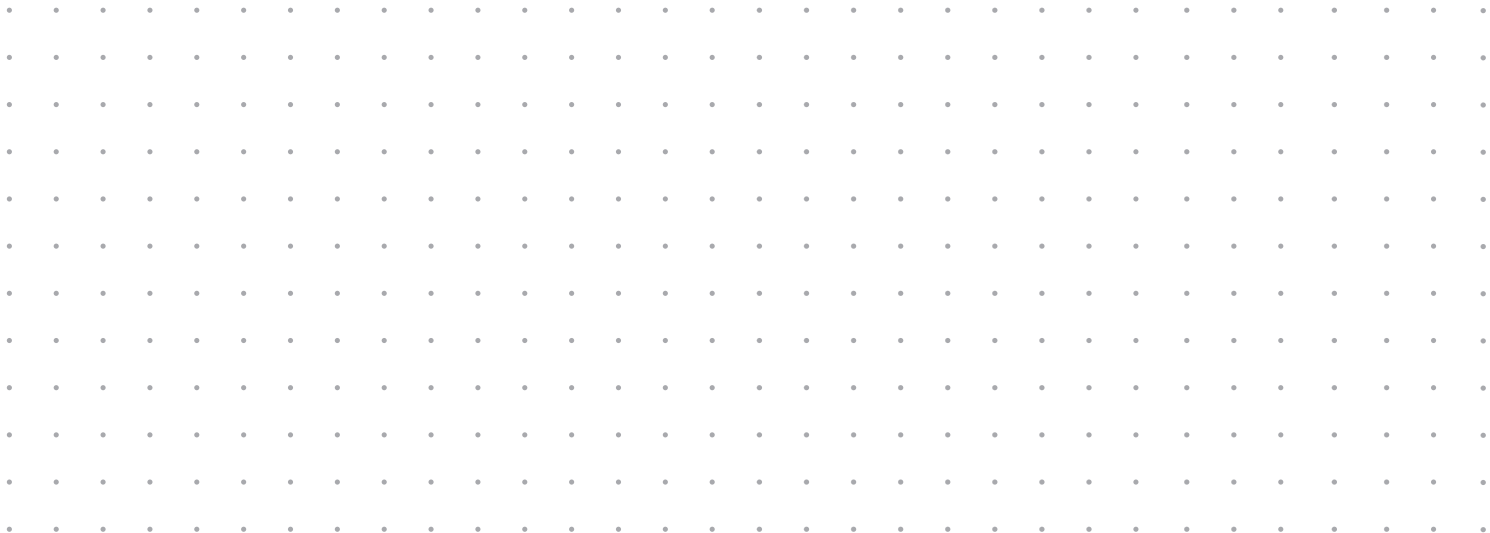

In addition to providing medical supplies and equipment, we also take on projects on a turn-key basis. Our team specialises in providing all necessary support - from planning to execution - to help establish as well as upgrade existing medical facilities. Our services in this regard include:

Hospital planning, design and implementation

Hospital infrastructure upgradation

Setting up Intensive Care Units (NICU,PICU,MICU, SICU, RICU etc.)

Setting up of Modular Operation theatres & Mobile units

KEY PARTNERSHIPS & PROJECTS

We have been associated successfully with some premier institutions and major government projects.

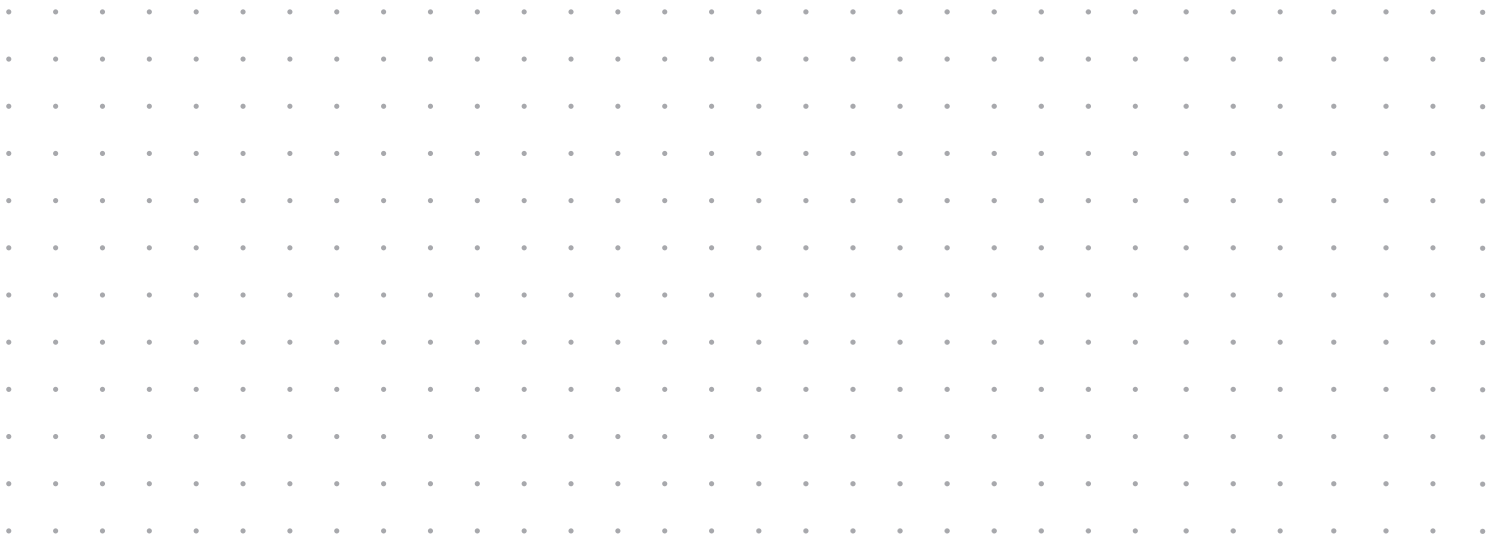

Central Ministries , State Government and PSUs
Indian Railways and Indian Armed Forces
Indian Trade and International Exports
Institutes & Training Centres
Corporate Hospitals and Pharma Retail

RELATIONSHIPS

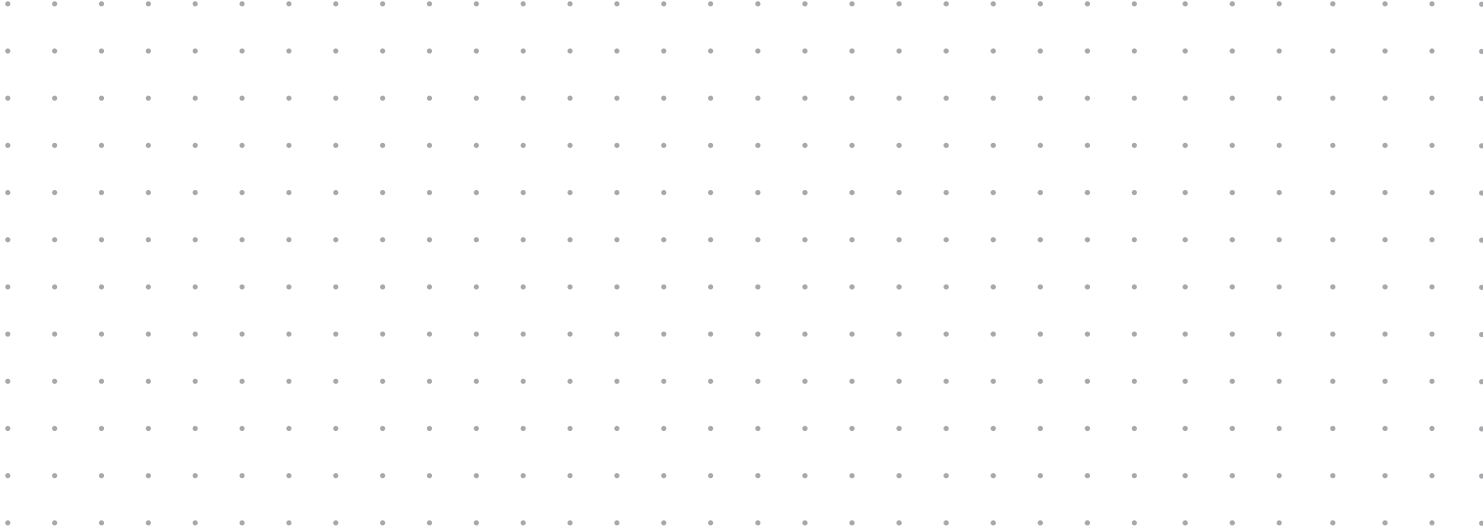

WORLD BANK PROJECT

During the pandemic, Sysmed greatly contributed to the World Bank-aided project of upscaling the existing health infrastructure of the country. Under the project, we were successful in setting up multiple general, neonatal and paediatric ICUs on a turnkey basis thereby better-equipping the country to deal with the unprecedented burden.

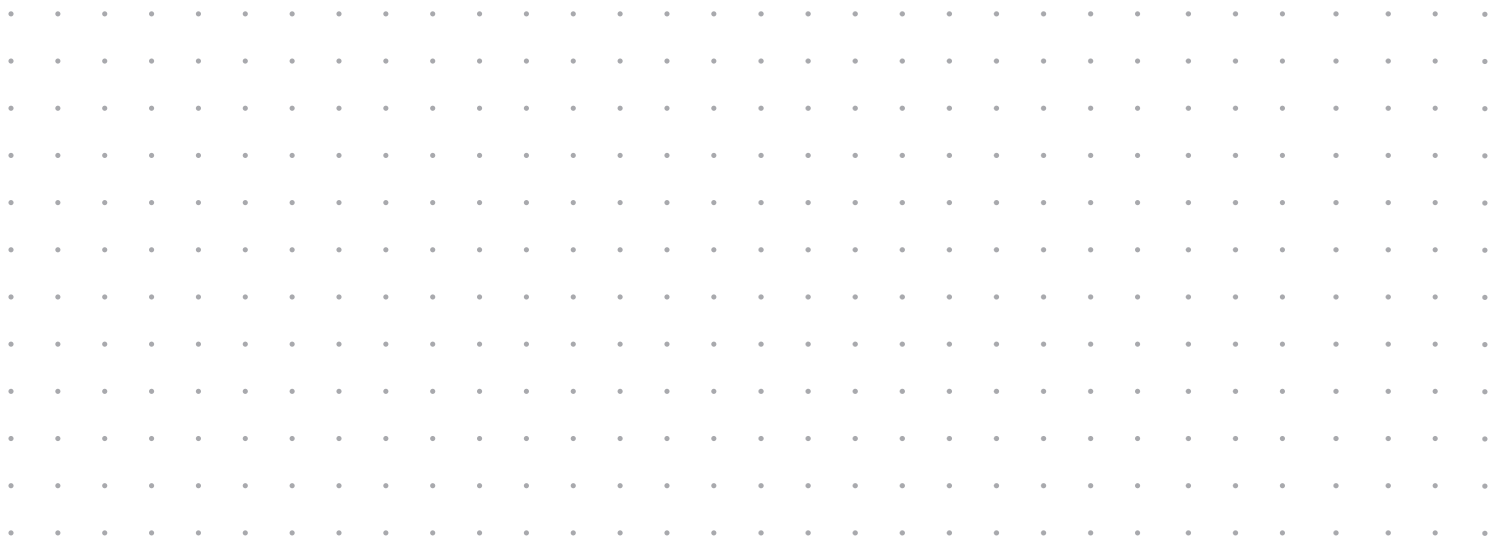

ASSOCIATION WITH AMPATH

Systemed has tied hands with AmPath,a pathology and diagnostic solutions stalwart, with the ambition of setting up a state-of-the-art pathology laboratory at New Chandigarh. We also aim to establish various collection centres across the city to facilitate higher penetration of these services among the masses. This project is yet another opportunity for the organisation to enhance access to new-age medical devices and services.

ANAEMIA MukT BHARAT [AMB]

Sysmed has been an active stakeholder in helping the government effectively tackle health problems arising due to lack of proper nutrition. We have undertaken various initiatives under PM's overarching scheme for holistic development - POSHAN Abhiyaan - to effectively combat health problems like anaemia. Even during the pandemic, Sysmed has installed anaemia testing kits based on the latest digital technology for faster and more accurate detection in almost 52 districts across India.

AYUSHMAN BHARAT

Sysmed has forged strong partnership with AMRIT (A government of India's initiative), to create a large retail pharmacy network and outlets in North India. The network now offers more than 5200 drugs, implants, surgical disposables and other consumables at afforbaffordable cost. In addition to that we have successfully upgraded 800 PMCs on a turnkey basis covering infrastructure, interiors and provisioning POC diagnostic equipment on behalf of the government of various states.

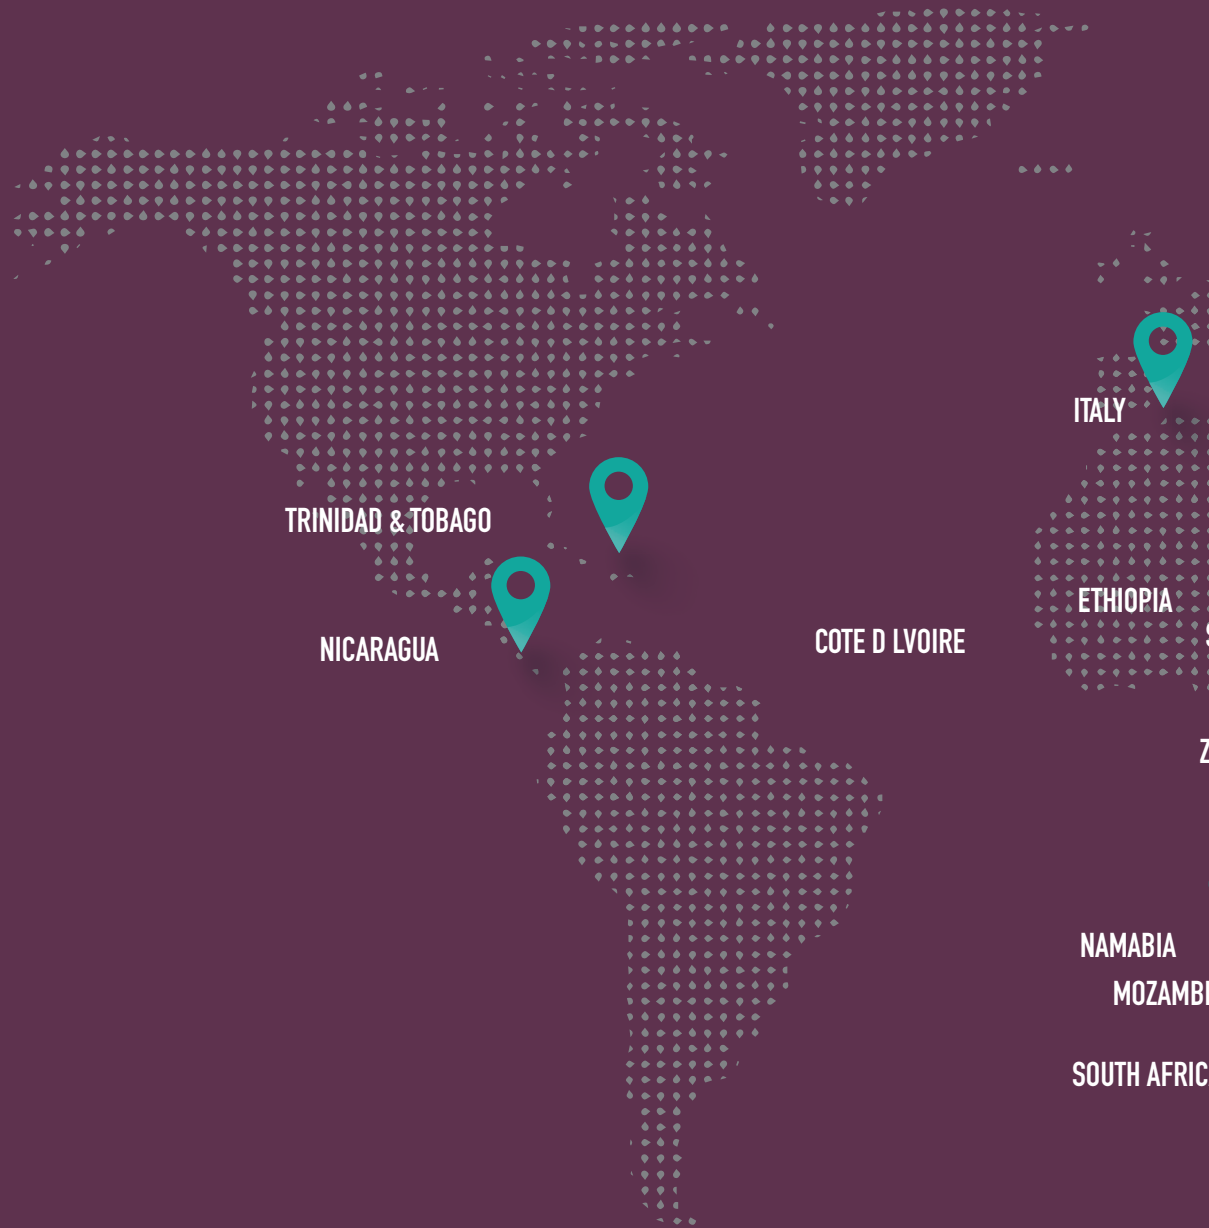

PARTNERSHIP WITH INDIAN STATE GOVERNMENTS & CORPORATES

Sysmed has proved to be a valuable support system to various state governments across the country by equipping them to effectively combat the COVID-19 pandemic. The team was committed to ensuring round-the-clock to ensure uninterrupted medical supplies, to various state governments and organizations like ONGC, DLF and We Foundation.

We have also been instrumental in strengthening the ambulance support infrastructure in many states by delivering ALS, BLS and Neonatal ambulances that are fully fitted with world-class care and monitoring systems. We have collaborated prestigious government institutions like Indian Railways and Indian Armed Forces, medical training centres, corporate hospitals and pharma retailers.

INTERNATIONAL EXPANSE AND REACH

Sysmed has been recognised by the Ministry of External Affairs to provide medical aid to underdeveloped and other developing countries across the globe. In the last two years, we have helped more than 40 countries to combat various health crises by exporting medical supplies and equipment worth 12.1 Million USD.

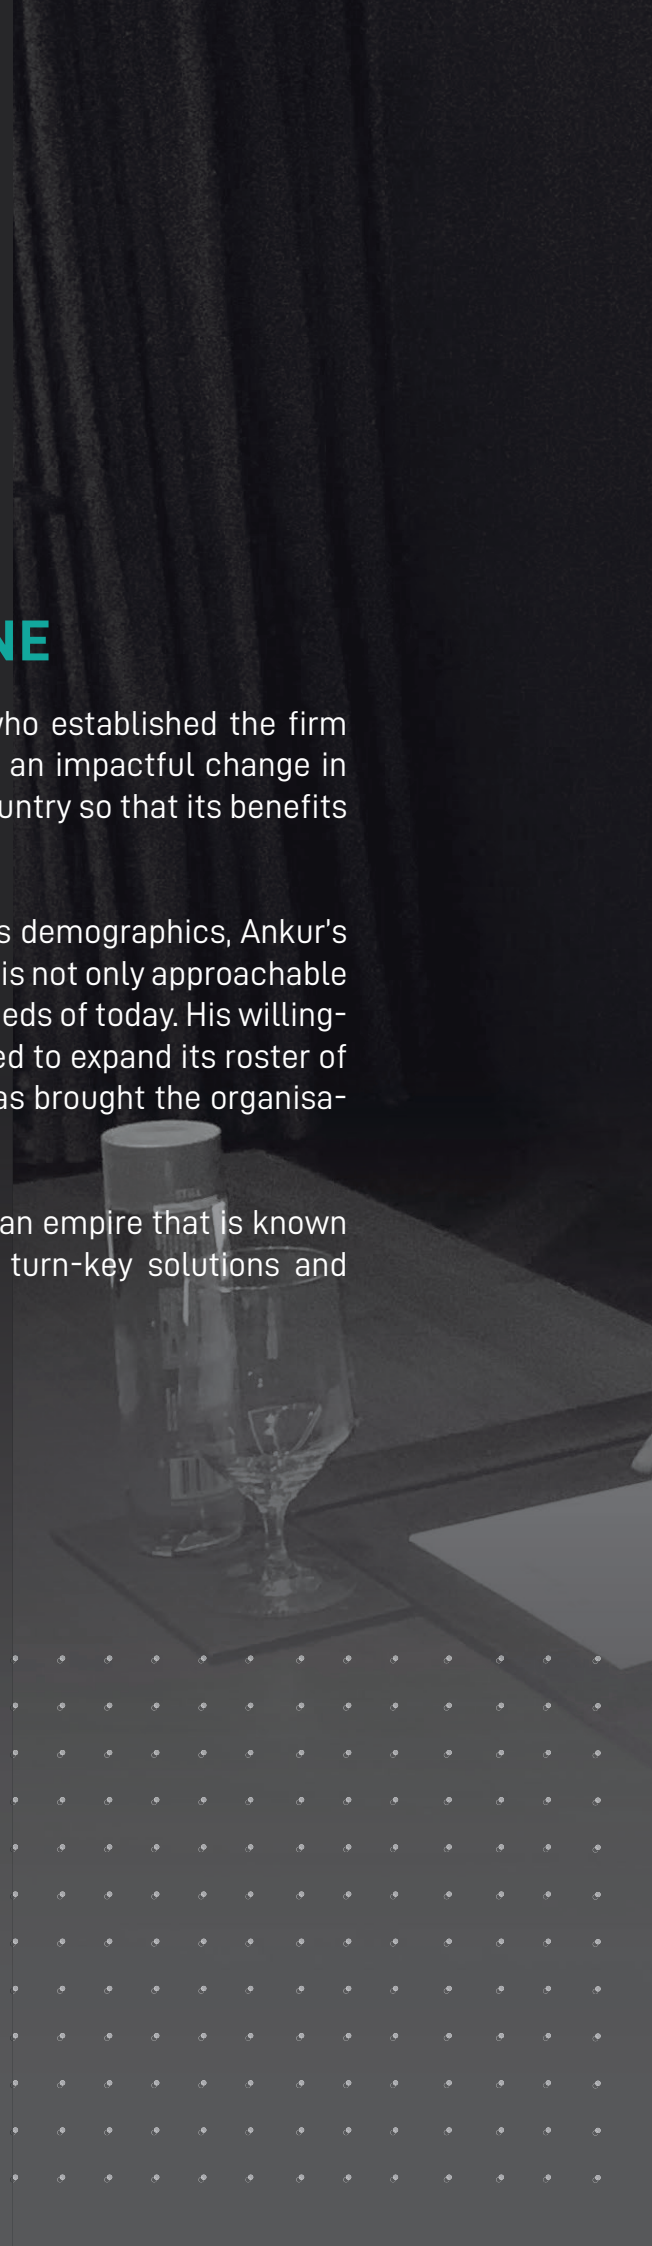

THE MAN BEHIND THE SCENE

Sysmed is the brainchild of Mr. Ankur Mangla, who established the firm with the intent of serving the nation and making an impactful change in bolstering the healthcare infrastructure of the country so that its benefits can be reaped by all.

With the determination of bridging the gap across demographics, Ankur's vision is to create a holistic healthcare space that is not only approachable but also innovative and ideal for the healthcare needs of today. His willingness to work round-the-clock has enabled Sysmed to expand its roster of services and operations and it is his vision that has brought the organisation to the front foot in a short span of time.

Over the years, he has worked ardently to create an empire that is known for its tenacious delivery, diversity of products, turn-key solutions and expertise in the healthcare sector.
